

- Play Equipment:**
1. ProLudic J1101 stainless steel wavy embankment slide, 3.5m high down grassy slope, 2+ years
  2. ProLudic G1150 embankment slide entry and starting deck, 2+ years
  3. ProLudic 11110 accessible inclusive double-width stainless steel slide, 1.4m high down grassed bank, 2+ years
  4. ProLudic G1160 1.4m high accessible inclusive timber embankment steps with handrail, 2+ years
  5. ProLudic J0P15-54 Origin Robinia 2.5m high log and rope embankment climbing net, 2+ years
  6. ProLudic 12409 accessible inclusive flush-mounted wheelchair roundabout, with large deck and room for up to two wheelchairs, three large supportive stainless steel handrails and large double seating bench for kids or carers, 2+ years
  7. ProLudic 1491 Origin Robinia accessible inclusive pod swing, metal beam, with ideal transfer height from wheelchair, large supportive foot seat and rubberised edge bumpers, 2+ years
  8. ProLudic 1498 Origin Robinia swing, 1.6m x 1.1m Gametime Zero-Q inclusive swing seat with lockable 'roller-coaster' style harness, metal beam and anti-wrap bearings, 2+ years
  9. ProLudic 1490 Origin Robinia swing with two flat seats, metal beam and anti-wrap bearings, 2+ years
  10. ProLudic 1499 Origin Robinia large group rope swing, 4+ years
  11. ProLudic 14920 Origin Robinia four seat seesaw, 3+ years
  12. ProLudic 149105 Origin Robinia 'The Ulysses' accessible inclusive user group group play platform, with ideal transfer height from wheelchair, large supportive handrail, large open deck for multiple users and three spring construction, 2+ years
  13. ProLudic 1880 Origin Robinia sit-on spring rocker, 2+ years
  14. ProLudic 14931V Origin Robinia multi-activity play unit, 2+ years, including:

- Stainless steel slide  
Inclined log climber (high)  
Vertical log climber (low)  
Inclined timber ramp climber  
Inclined wobbly climbing ladder  
Rope net climbing / Traversing wall between decks  
Crawl tunnel between decks  
Slatted bridge between decks  
Roofs to two decks  
Shog front / den area below deck  
Steps between decks  
Six platform configuration
17. Ropecamp RC 802 4.26m high rope net climbing structure, with internal rope web climbing rope, external metal beam exoskeleton frame, above-ground tensioning mechanism in the structural spheres, 5+ years
  18. ProLudic 149140 auditory sensory social talk tube set of two, 2+ years
  19. Fahr auditory tactile sensory play panel - virtuoso bongo tree, 2+ years
  20. Fahr auditory tactile sensory play panel - virtuoso tube chimes, 2+ years
  21. Fahr visual tactile sensory play panel - giant rock paper scissors, 2+ years
  22. Broxap derby litter bin x 2
  23. Ecoplastic model 12 sunset with back rest and arm rests x 4
  24. Ecoplastic model 66 easy access picnic table x 3

**The play area** will consist of the existing upper play area, which will become the toddler and inclusive play zone, linked to a middle play area on the lower level connected via talk tubes and an embankment climber, then linked further to the lower play area level connected by 1.1m and 3.5m high embankment slide as well as accessible steps.

**Safety Surfacing:**  
Garden Escapes resin-bound rubber mulch safety surfacing, natural colour mix, is to be installed to the entire upper, middle and lower play areas as shown.

Surfacing thicknesses will vary to meet the free fall heights requirements of each piece of play equipment, as per current EN1176 & 1177 safety standards.

The colour scheme(s) and/or theme(s) shown on the drawings are for illustration purposes only and can be a pre-caution and to assist in reducing wear on the slides.

Grass mat safety surfacing will also be installed to the embankment climber and slide as well as to assist in reducing wear on the slides.

**Remaining Surfacing:**  
A small tarmac pathway will be created to connect the lower play area to the existing wide pathway that runs partly down the hill. This path will have arc-cut concrete edge kerbing and will be finished in porous open textured bitmac. Please note that the existing pathway would have a gradient well in excess of what would be considered accessible and inclusive; this new path will merely connect to that and is intended for parents to access the lower area by pathway to supervise children; it is not intended to provide access for wheelchair users which is not possible within the current budget given the extreme variations in site levels.

All remaining areas will remain in their current condition, with any disturbed areas being reinstated on completion.

New topsoil and grass seed will be laid between the car park path and the dwarf wall kerbing in the upper play area, to tidy up this area which is currently worn away and potentially hazardous.

The existing bridge at the upper toddler play area will be trimmed to be reduced in height, as well as a section removed to allow access between upper and middle play areas via the embankment climber.

Trees shown are existing; some may need to be ground and trimmed back which must be done by trained council operatives prior to our arrival on site; all additional planting is indicative and illustrative only and is not included in our proposal.

**Fencing:**  
1.2m high IBEK safety weldmesh fencing is to be installed to the open area at the top of the bank either side of the proposed embankment slide.

**Play Equipment:**

1. ProLudic J1101 stainless steel wavy embankment slide, 3.5m high down grassy slope, 2+ years
2. ProLudic G1150 embankment slide entry and starting deck, 2+ years
